
Identification sheet

How to tell the Shimano 9100 and 9200 OSPW Systems apart

Differences in the Rotation Stop Tower

Shimano 9100:

- Stop Tower ends with an even rounded profile
- Low tension marking, 'L', is to the left of the tower end

Shimano 9200:

- Stop Tower features a flat end on the left
- Low tension marking, 'L', placed on top of the tower near the left

Differences in the Mounting Pin

Shimano 9100:

- Single wide recessed band around the middle of the pin

Shimano 9200:

- Narrow deep groove in the middle of a wide shallower band around the middle of the pin
